GIT REPOSITORY FILE

Task-1: Creating a GIT Repository and Uploading Assignments

Step 1: Create a GIT Repository

1. Open your command line or terminal.
2. Navigate to the directory where you want to create the repository.
3. Run the following command.

```
git init 2201030400096

cd 2201030400096
```

Bash:

This will initialize a new Git Repository.

Step 2: Create Assignment Folders

1. Inside the repository, create two folders.

Bash :

```
mkdir Assignment-1

mkdir Assignment-2
```

Step 3: Prepare Word File

1. Open your preferred text editor (e.g., Microsoft Word, Google Docs).
2. Document each step of the process with clear instructions.

Step 4: Save Word File

1. Save the Word file as "GitAssignmentInstructions.docx".

GIT REPOSITORY FILE

Step 5: Add, Commit, and Push

1. Add the Word file to the repository and commit the changes:

Bash:

```
git add GitAssignmentInstructions.docx

git commit -m " Assignment-1"
```

2. If you haven't already, create a remote repository on GitHub (https://github.com).
3. Link your local repository to the remote one:

Bash:

```
git remote add origin https://github.com/nishthapatel1010/2201030400096.git
```

4. Push the changes to GitHub:

Bash:

```
git push -u origin master
```

Process is completed . to Push a Word file in Git Repository .
